

SoberTrack

GPS-ENABLED MOBILE BREATH ALCOHOL TESTING UNIT

Test Anywhere, Any Time and know the Enrollee's GPS location *Before, During and After the Test*

- Handheld and mobile allows testing at any time and in any location
- Camera takes high-resolution image of enrollee during each test
- Receives GPS location points before during and after a Breath Alcohol Test (BAT).
- Reports all test results and GPS location points to VeriTracks using nationwide cellular networks

Enhancing Community Safety by keeping Enrollees Accountable.

- Increase public safety
- Providing support mechanisms to Enrollees so they stay accountable complying with terms and conditions of their supervision.
- Address addiction, a core cause of recidivism.
- Enhance supervision for pretrial, and post enrollees.
- Allow participants to maintain employment and support their families, while being accountable.
- Extensive reporting capabilities that support Evidence-based practices.
- Demonstrate compliance and modified behavior.
- Provide timely evidence of compliance with alcohol abstinence and curfew orders.
- Can be paired with BLUtag, or BLU+ for enhanced supervision
